Retap is all
about water

Sustainable hydration . Scandinavian design

Retap is all about water

We are all humans and our bodies consist of 60% water. We are all water. We need water to stay hydrated. To stay focused. To stay healthy. To stay happy.

Retap is living this need. And we do it in a sustainable way. Not only by freeing the oceans from plastic. But by freeing you and me from plastic and contaminants from our drinking water. A life without clutter, without haste, without waste, without empty water bottles and needless consumption.

The story behind the brand Retap

Retap is a Danish hydration company founded in 2009. We offer Retap Drinkware - reusable bottles, carafes and water glasses especially designed to drink tap water from. We believe the best way to drink water is by refilling reusable drinkware with tap water.

Retap was founded by three enthusiastic entrepreneurs in 2009 who were initially influenced by reading about the accumulation of plastic trash in our oceans consisting mainly of plastic bottles.

“At the UN climate meeting back in 2009 in Copenhagen (COP 15), we became more aware of the negative impact of bottled water on our environment. We felt that something had to be done. We set our minds to designing a bottle especially made for drinking tap water. One year and many designs later in the summer of 2010, we released the Retap Bottle and we are very proud of this sustainable and beautiful product”, explains Lars Brøndum Petersen, one of the founders.

Since then more bottle sizes and bottle accessories have been added to the Retap product range along with a carafe and water glasses. Retap products are sold in more than 60 countries worldwide. The main office is located in Agerskov, Denmark.

The Retap Way has become more than a way of drinking water. It is a way of thinking, a way of rethinking the way we drink water. It is easy, inexpensive, and the most sustainable way to stay hydrated.

Through the years the first part of Retap's vision has unfolded. Today - more than a decade after the idea of creating a sustainable water bottle first came up - we feel more than ever that we all must do our best to make our impact on the environment as low as possible.

Our vision unfolding

Throughout the years Retap has built a strong network of resellers and distributors. Retap products are sold in more than 60 countries worldwide and are available in a wide selection of stores. Retap products are available through promotional merchandise agencies and in stores in cities like Sydney, Tokyo, Paris, Madrid, Berlin, Amsterdam and Stockholm.

A simple act can make an impact

We want to motivate everyone to be more sustainable. That is why we offer customised logo prints on our Retap products. A customised Retap product provides companies the opportunity to show their sustainable action and inspire others to make an environmental impact.

Our custom printed Retap products have been chosen by brands like Nike, CBS Sports, the MTV Movie Awards, Vodafone, LEGO, Maersk, Rambøll, Marriott Hotels, Dior, Cartier, HP, Saxo Bank, Eurosport, Banijay Nordic, TV2 Denmark, Spotify, Swatch, Bluewater, Deloitte, Søstre Grene, Bosch, TDC, Miele, KPMG, Amazon, Audi, Suzuki, Volvo, Mazda, SOS International, Novo Nordisk, Zeiss, Grundfos, Grohe, Waterlogic, Danfoss and The Danish Ministry of Climate, Energy and Utilities.

Sustainable hydration

Water is the essence of life and should not be exploited in a way that harms the environment. We encourage drinking water from the tap and using reusable drinkware to do so.

Whether you prefer your water filtered or straight from the tap, using The Retap Way is easy, inexpensive and the most sustainable way to stay hydrated.

Retap Drinkware is reusable bottles, carafes and water glasses especially designed to drink tap water from.

By refilling reusable drinkware from Retap you help lessen the environmental impact of transporting bottled beverages in plastic bottles. Transporting plastic bottles over long distances costs energy and disturbs the natural cycle of water. Bottled water requires up to 2,000 times the energy used to produce

tap water. And it takes around 450 years for a plastic bottle to completely degrade.

Staying hydrated The Retap Way is an easy way to support the environment.

Flavour your water

**ZERO

RETAP FLAVOUR INSTANT WATER TABS

A delightful collection of instant flavouring tabs that take your water from ordinary to extraordinary. Pick your favourite - and make a splash in your daily routine. Staying hydrated has never been this easy.

RETAP IS ALL ABOUT WATER

Retap Flavour Instant water tabs

At Retap, we understand the importance of staying hydrated throughout the day. That's why we're excited to introduce Retap Flavour, a delightful collection of instant flavouring tabs that take your water from ordinary to extraordinary. Imagine sipping on your daily water with a burst of fruity goodness.

Our water tabs are carefully crafted to infuse your tap or filtered water with a subtle, natural hint of flavourful fruits and berries. It's a delightful way to make hydration an enjoyable experience, adding not only flavour but also a boost of energy and essential vitamins to keep you going.

In a world where convenience matters, Retap Flavour stands out as a convenient supplement to your daily water intake. It offers a sustainable alternative to bottled flavoured water, reducing your carbon footprint by eliminating the need to transport water over long distances.

With Retap Flavour, you can personalize your hydration routine to suit your taste preferences. Say goodbye to dull hydration and hello to an appealing fusion of nature's best flavours in every sip. Choose from a consciously crafted selection of flavours to heighten your senses and make your hydration experience truly enjoyable.

Make a splash in your daily routine and quench your thirst in a delightful way with Retap Flavour. Because staying hydrated has never been this flavourful, convenient, or eco-conscious.

Experience the joy of hydration like never before - your taste buds and the environment will thank you.

Retap Flavour

Pick your favourite

Cranberry

A Tangy Treat

Indulge in the tangy allure of our Cranberry flavour. Savory and satisfying, it offers a deliciously unique taste that elevates your hydration routine.

Cranberries are known for their antioxidants, making this flavour a wholesome choice. Let every sip be a celebration of flavour and well-being.

Guarana Grapefruit

Energize Your Day

Start your day with a zing of energy from our Guarana Grapefruit flavour. Combining the invigorating essence of grapefruit with the natural boost of guarana, it's a flavour that tantalizes your taste buds and energizes your

body. Guarana is renowned for its natural caffeine content, providing a gentle, sustained energy lift, making this flavour a perfect pick-me-up to stay alert and focused throughout the day. Embrace the fusion of flavours and vitality in every sip.

Lemon Lime

A Zesty Refreshment

Immerse yourself in the zesty embrace of Lemon Lime flavour. Experience the invigorating citrusy notes that awaken your senses and provide a burst of energy. Packed with Vitamin C, this flavour fusion not only adds a delightful twist to your water but also boosts your immune system, making hydration an exhilarating journey.

We support goal 6, 12 and 14

Leave no one behind

The United Nations Sustainable Development Goals aim to achieve a more sustainable future for everyone. The framework of these goals highlights the global need for development. The goals address the challenges related to climate change, poverty, inequality, environmental degradation, peace and justice. To reach the goals, everyone needs to act.

Everybody can make small changes in their everyday life in order to make a difference.

Retap is involved in the Global Goals because we care. We focus on three goals:

Goal 6:
We want to put accessible drinking water on the agenda.

Goal 12:
We are trying to ensure a sustainable production by producing in Europe using durable and sustainable materials.

Goal 14:
Our purpose is to protect the oceans from plastic waste. We want to help reach the goal of minimising the pollution from single-use plastic water bottles. Today millions of reusable Retap Bottles are being used and they replace an even bigger amount of single-use plastic bottles.

SUSTAINABLE DEVELOPMENT GOALS

Award-winning design icon

There is something about it. The Retap Bottle. To be honest, we had a good feeling right from the beginning - this was something.

The Retap Bottle makes sense. The simple lines in the design. The thought of having a one-piece-design without any edges. A functionalistic design with a great water flow. A sustainable bottle that is easy to refill from the tap. It makes sense.

Retap has proudly received The Red Dot Design Award, The Promotional Gift Award and The Good Design Award.

Retap Original Bottles

The award-winning Retap Bottles are sustainable alternatives to single-use plastic water bottles. The simple, elegant and functional Scandinavian design guarantees a great water flow and makes it easy to refill from the tap. By using reusable drinkware, drinking water becomes a pleasant and eco-friendly experience.

Companies can make a sustainable difference by choosing Retap Bottles instead of single-use plastic bottles, for example as a part of their CSR-strategy. We offer customised logo prints on the Retap Bottles. It gives organisations the opportunity to show their sustainable action and inspire others. The bottles are ideal for use in offices, hotels, at events or as customer gifts.

The Retap Bottles are made from borosilicate glass, which is heat-resistant, lightweight and meets the highest hygienic standards. It is a pure material without lead or cadmium and it cannot contaminate water.

Our products are produced in a responsible way: Retap Drinkware is made from up to 30% recycled glass and to give a stronger durability, the drinkware is made from one piece of glass.

The Retap Original Bottles are available in three sizes: 300 ml, 500 ml and 800 ml.

Retap Go Screw Lid Bottles

The Retap Go 05 holds 500 ml of water and the Retap Go 08 holds 800 ml, and now also carbonated water.

The biggest difference from the original bottle is that we have added a screw cap to make the bottle more secure when bringing it with you, on-the-go.

The Go bottles are elegant, lightweight and fits well in your hand. Every time you refill your glass bottle you take another step towards a cleaner future.

The key here is to reuse, and to reduce. The Retap Go Bottles will be your perfect buddy to avoid single-use plastics in your everyday life.

- Designed in Denmark
- Made of up to 30% recycled, high-strength borosilicate glass
- Free of PVC, bisphenol A (BPA) and phthalates
- Lightweight, hygienic, and sustainable
- Easy to clean with its wide opening
- Dishwasher, microwave, and refrigerator safe
- Comes with 6 different standard lid colours
- Easy to refill and reuse
- Ready for custom print

Retap Carafe & Water Glasses

The Retap Carafe is simple and elegant and aligns with our awarded Retap Bottles. The Scandinavian design assures that the carafe with its elegance and functionality fits into any setting – in offices or at home.

The Retap Water Glasses are the perfect match to the Retap Carafe. This beautiful set can be used for different occasions.

To give companies the opportunity to show their sustainable action and inspire others, we offer customised logo prints on the carafe and water glasses. The carafe and water glasses are made from up to 30% recycled borosilicate glass.

The carafe, water glasses, TPE lids and the logo print are dishwasher proof. The products are designed in Denmark and made in Europe.

The carafe can contain 1.2 litres and the glasses hold up to 400 ml.

12
CARAFE

04
GLASS

Retap lids for glassware free of PVC, BPA and phthalates

The Retap Lid for the borosilicate glass drinkware completes the design of the Retap Bottle. The lids follow the Scandinavian design tradition with its simplicity and functionality.

The Retap lids are designed in Denmark. The Original lids are made of thermoplastic elastomer (TPE) and do not contain PVC, bisphenol A (BPA) or phthalates, so the lid will not affect the water. We use TPE due to its low environmental impact compared to single-use plastic lids and because of its elasticity: The lids need to stretch out to smoothly fit the Retap Original Bottle but also be solid enough not to fall off.

The material of the Retap Go screw lids is Polypropylene which is a thermoplastic polymer (PP).

The Go lids do not contain PVC, bisphenol A (BPA) or phthalates. Both lids can resist heat up to 120°C before they deform, which makes the lids dishwasher proof. The lids are 100% safe to reuse over and over again and the TPE is easy to recycle.

Retap offers a large selection of lid colours with the opportunity to customise the Retap Bottle and make it fit any individual taste, personality or logo printed on the bottle.

The opening on all three Retap Original Bottle sizes is the same, which makes it easy to change lids between the three bottles. The opening on both Retap Go Bottle sizes is also the same.

Oak and walnut wooden lids handcrafted design

The award-winning Retap Bottle is simple, functional and elegant. It pays tribute to the Scandinavian design tradition and so do the Retap Oak Wood Lid and the Retap Walnut Wood Lid.

The curvy oak and walnut wooden lids are handcrafted and of excellent quality. The natural structures and complexity in the wood gives each lid a unique look. Inspired by nature, the lids offer an exclusive, sustainable and nostalgic touch to the Retap Drinkware and makes it look even more elegant and authentic.

The wooden lids finish the aesthetics of the iconic Retap Bottles perfectly and look great in any interior setting. The lids have a loose fit and are easy to take off the bottle. This makes them ideal for conferences, in business settings, in restaurants or at home. The wooden lids are not available for Retap Go.

Retap Bottle Sleeve

To protect the Retap Bottle, we have developed an elegant sleeve made from strong and durable cotton. The Retap Sleeve smoothly follows the curves of the bottle. It is soft, pleasant to hold and gives a good grip. The attached strap makes the bottle easy to carry with a finger or two.

The beautiful and functional sleeve is available in seven different colours for Retap Original, Retap Go and Retap Stainless Steel.

The Retap Sleeves are washable at 40°C

Retap Glass Drinking Straws

The Retap Glass Drinking Straws are simple and elegant and fit easily into the Retap Bottles. To minimise plastic waste and avoid single-use plastic straws, the glass straw is the essential sustainable alternative. The Retap Glass Drinking Straws are non-toxic, BPA-free and the contact with food is safe. The glass straw has a superior durability, it is dishwasher safe and can be reused again and again.

The Retap Glass Straws are made from borosilicate glass, which is heat-resistant, light-weight and meets the highest hygienic standards. Borosilicate glass is a pure material without lead or cadmium and it cannot contaminate water.

The Retap Glass Straw comes in a set of 6. The box includes a handy cleaning brush.

Non-packaging Concept

The bottle is the packaging

To act and live as sustainably as possible our concept is non-packaging, which means we usually do not use single packaging for our products. Our FSC-certified Inserts (FSC®-N003022) placed inside the Retap Bottles and Retap Carafes contain the necessary information about the Retap products. This is our solution to reduce waste originating from packaging.

Occasionally single packaging is necessary. If so, all our single packaging is FSC-certified as we support a responsible use of the world's forest resources.

Sustainable facts the overview

Retap's mission is to minimise the consumption of single-use plastic bottles. We believe the most sustainable way to drink water is by refilling reusable drinkware with tap water. By avoiding single-use plastic, we protect the environment and people against chemicals and microplastic. Using a Retap product is an easy, inexpensive and sustainable way to stay hydrated and it helps cutting down the daily plastic waste.

How sustainable is a Retap Bottle?

An independent research made by Carbon Footprint Ltd. shows that it is possible to save 17,48 kg CO₂e every year by using a Retap Original Bottle instead of a standard 0.5 L PET plastic bottle. After refilling a Retap Original Bottle three times, the environmental impact will be lower compared to using one single-use plastic water bottle.

Non-packaging Concept

To act and live as sustainably as possible our concept is non-packaging, which means we usually do not use single packaging for our products. Our FSC-certified Inserts (FSC®-N003022) placed inside the Retap Bottles and Retap Carafes contain the required information about the Retap products. This is our solution to reduce waste originating from packaging. Occasionally single packaging is necessary. If so, all our single packaging is FSC-certified as we support a responsible use of the world's forest resources.

Strong, durable and lightweight glass

Retap glass drinkware is made from strong borosilicate glass, the same durable glass used in laboratories and high-end cookware. Borosilicate glass is heat-resistant, lightweight and meets the highest hygienic standards. It is a pure material without lead or cadmium and it cannot contaminate water. Retap glass drinkware is made from up to 30% recycled borosilicate glass. To give a stronger durability, each product is made out of one piece of glass. Glass itself is a natural material mainly made from Silica sand.

Lids

The Retap Original lid is made of thermoplastic elastomer (TPE), which is free of PVC, bisphenol A (BPA) and phthalates. The TPE material is carefully selected due to its physical properties and low environmental impact compared to single-use plastic bottle lids. The advantage of using TPE is that the material is easy to recycle.

The material of the Retap Go lid is Polypropylene which is a thermoplastic polymer (PP). The lids are free of PVC, bisphenol A (BPA) and phthalates. TPE and PP is resistant to heat up to 120C before deforming. The lids are easy to wash in a regular dishwasher and they stay 100% safe to reuse.

Impact and savings

Carbon Footprint

Independent research by Carbon Footprint Ltd has shown that it is possible to save 17.48 kg CO₂e every year by using a 500 ml Retap Original Bottle instead of a 500 ml PET bottle. The research also shows that after refilling a Retap Original Bottle three times, the environmental impact will be lower compared to using one single-use plastic water bottle.

carbon footprint

Carbon Footprint Ltd certifies that

288.40 grams of CO₂e

are released during the entire life of a Retap 500 ml bottle (this includes raw materials extraction, processing and transport, as well as product manufacturing, distribution, usage and disposal)

and that

17.48 kilograms of CO₂e

are saved every year when using a 500 ml Retap bottle instead of a 500 ml PET bottle

Following the production of three 500 ml PET bottles, the generated emissions exceed those of one 500 ml Retap bottle.

Sustainable hydration

For your employees

It is important to stay hydrated. Yet, most of us are not drinking enough water. If hydrating has become more of a chore rather than a healthy habit in your company, Retap Drinkware can be an easy way to stay hydrated throughout the day. Print your company values or a motivational text on a Retap Bottle and inspire your employees to drink more water.

...at your meetings

Serving water at business meetings provides a welcoming atmosphere. The Retap Drinkware shows potential customers and business relations your awareness of personal health and sustainability.

...at your conferences

The Retap Carafe and Water Glasses are great for self-serving during breaks while the Retap Bottle is perfect as a table bottle during the conference sessions. Make the products available for all attendees to collect at the entry. Add a custom print on the Retap products and use them as a take-home item. Your logo will stand out and your branding will be extended beyond the conference.

...at your events

Retap products are great promotional items for events, anniversaries or happenings. With a Retap product as your event give-away you will be handing out something that is unique and really valuable to your guests. A well-thought-out giveaway is not only useful for your guests, but will also reinforce your brand.

...for your guests

The Retap Carafe and Water Glasses are perfect for restaurant use. The beautiful design adds visual interest to any buffet or dinner table. With a wide range of different lid colours and custom branding possibilities, you can capture your restaurant's style. Add a custom print on the Retap products and offer them as a take-home gift for your guests.

JANUARY 2024

Terms & Conditions

Sustainable hydration . Scandinavian design

Retap

Terms & Conditions

Payment

All new resellers have to pre-pay their first order. As a standard, you will have 8 days for payment of each following order. If invoices are not paid on time, Retap has the right to demand pre-payment on future orders. For all orders exceeding 10,000 Euros (EUR), we charge 50% of the order amount as upfront payment and the remaining 50%, 8 days after the final invoice.

Prices

Prices are established as specified on the price list and valid until further notice. Within the EU there are no extra charges such as customs or taxes.

Privacy

Your personal details will never be passed on to any third party for marketing use. We will contact you again concerning your current order or with offers that relate to your earlier orders. You will only receive our newsletter if you are signed up. We require a phone number at which you can be reached from 8 am to 5 pm for urgent information and for delivery details.

Consumer rights

None of the above terms and conditions affect your statutory consumer rights.

PR

We may use your logo and/or your custom made logo products for PR and marketing purposes. e.g. presenting your custom printed products on fairs, in printed materials, on our homepage or social media channels. If you do not agree with these terms please inform your contact at Retap when you order.

Print

Please notice that printed colours on glass may have a more transparent and lighter look than the actual Pantone Matching System (PMS) due to the transparent nature of the glass.

Bad quality print and broken products

If you receive custom printed products with bad quality on the print (scratches, missing color etc.) or if you receive broken products, please inform your contact at Retap within 14 days. You will receive a credit note on the number of badly printed or broken products. We print the exact ordered number of products and are not able to replace broken bottles with individual print, instead you will receive a credit note on the number of broken bottles.

Retap Drinkware

Custom Print

We want to motivate everyone to be more sustainable. That is why we offer customised logo prints on our Retap products. A customised product provides companies the opportunity to show their action and inspire others to make an environmental impact.

We print logos and taglines or other design elements on the Retap Drinkware. With low minimum order quantities even small businesses can benefit from Retap Drinkware with custom print. The drinkware is made from high-quality materials and has a long-lasting print.

It can be reused over and over again without losing its value. With a wide range of different lid colours, there is always a colour that fits your company profile.

The customised drinkware can be used for multiple purposes. Retap products are a valuable business gift both as a premium give-away for customers or as a unique employee gift. They give style and value to meetings and conferences. They create awareness of the cause at benefits and special events. They highlight the celebration at anniversaries and promote happenings and festivals.

And they are treasured by employees in corporate offices every day emphasising the company values and the importance of staying hydrated in a sustainable way.

Retap Drinkware

Colours and technique

Printable area

The printable area on the Retap Drinkware is a long strip on the widest part of the bottles and carafes. The Retap Glasses have a smaller printing area which does not go all the way around the bottles and carafes. There is a gap of a few centimetres.

Frosted - our most popular print

Retap Drinkware is printed with a silk screen printing technique. We print all colours from the Pantone

Matching System (PMS) or frosted which looks like an engraving on the glass.

We print either 1, 2, 3 or 4 Pantone colours on the drinkware - or frosted (1 colour). Sometimes the shape and look of the logos, taglines or design elements will be too complex to print with the silk screen printing technique. In this case we will do our best to find a print solution that does not compromise your brand.

Custom Print

Quantity & Delivery

Minimum order quantity for custom print

- 120 pieces for the Retap Bottle 03
- 112 pieces for the Retap Bottle 05
- 108 pieces for the Retap Bottle 08
- 112 pieces for the Retap Go Bottle 05

Retap Standard Packaging

To act and live as sustainable as possible, our awarded concept is non-packaging, which means that we as a standard do not use single packaging for the products. The Retap Drinkware is packed in cardboard boxes (Colli Box).

The boxes contain either:

- 40 pieces of the Retap 03 Original
- 28 pieces of the Retap 05 Original
- 18 pieces of the Retap 08 Original
- 15 pieces of the Retap Carafe
- 24 pieces of the Retap Water Glass
- 28 pieces of the Retap 05 Go
- 18 pieces of the Retap 08 Go
- 28 pieces of the Retap 05 Stainless Steel
- 18 pieces of the Retap 08 Stainless Steel

Each bottle and carafe comes with an FSC®-certified (FSC-N003022) paper insert, which contains all the necessary product information. The insert is free of charge. If the insert is not wanted, please inform us when placing the order.

As a standard the lids are not mounted on the bottles.

Retap Single Packaging

For clients interested in single packaging, we offer Retap Single Boxes for each bottle size, carafe and water glasses. In order to reduce waste from packaging, the paper inserts are not included as a standard when the single boxes are chosen. We also offer 4 colour custom printed single boxes in white, which can be customised with the client's design.

The Retap packaging is FSC®-certified (FSC-N003022) as we support a responsible use of the world's forest resources.

Please notice our single packaging is packed in our standard cardboard boxes/colli boxes.
